BUILDING HER FUTURE

Kasey Brandenburg

"I want to know how to use tools and want to be sure I can be independent," is why Kasey enrolled in Prosser's Construction Technology program. Kasey became interested in attending Prosser after visiting all of the programs here last year with her Austin High School classmates. When she saw one girl among all the male students helping build a house, she thought "that can be me." Kasey demonstrates

Kasey Brandenburg is an Austin High School junior. She is the granddaughter of Ms. Lynette Wolf.

daily focus and determination, and confidently stated she is very capable of doing everything that needs to be done to be successful in the construction field. She plans to compete in the regional Skills/USA competition in February and is hopeful to advance to State competition in Indianapolis in April. Kasey said she is learning more than how to use tools and building houses, "I am also learning how to work hard." She smiled and added "Mr. Zimmer won't let anyone, not work hard." Kasey Brandenburg will earn her Indiana Academic Honors diploma upon graduation in 2018.

PLANNING PRECISION

Will Meadors

Will is a senior in Prosser's Precision Machining program and boasts a GPA of 4.16. Will is a two year member of Skills USA and a regional Gold Medal winner last year. He will be competing again this year in the CNC Technician contest and is aiming for the gold medal at State and Nationals. Will is working toward a Technical Honor's Diploma, the PRIDE Work Ethic Certification, and in his spare time plays varsity tennis, golf, and loves to hunt and fish. He is an avid volunteer for NRA and was the youngest

volunteer in the state for the first 3 of his 7 years volunteering. Will is one of Prosser's nominees for the Award For Excellence which puts him in the running to be one of Indiana's Top Ten CTE high school students. While at Prosser, he will earn fourteen dual credits that will put him well on his way toward a degree from Vincennes University, where he plans to attend upon graduation.

Will Meadors is a senior at New Washington High School. His parents are Stacey and Kurt Meadors.

DIGGING DEEP

Dylan McAnelly

Dylan McAnelly is in his second year of Prosser's Heavy Equipment program. He currently holds a 3.96 GPA, and is eligible for his Technical Honors Diploma. He recently completed an externship at Bryan Stumler Excavation in Floyd County, which has garnered him real world, on the job training skills. Stumler Excavation has been moving the earth in our community for over twenty-four years. Dylan had the exposure and opportunity to learn about a company that builds premiere lakes, ponds, storm/sewer infrastructure, and does construction site work. He plans on utilizing his education in this program to be prepared to engage in the workforce, be self-sufficient and productive, while utilizing the NCCER certification he will receive. In his spare time, Dylan is on the New Albany football and baseball teams and has a part-time job. Dylan is a PRIDE Work Ethic candidate.

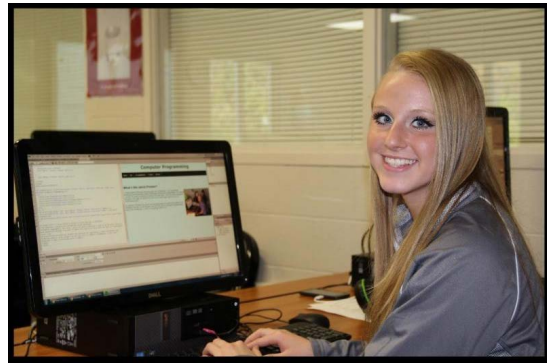

Dylan McAnelly is a New Albany High School senior. His parents are Ronald and Faye McAnelly.

DESIGNING HER PATHWAY

Amanda Goodridge

Amanda Goodridge knows what it is like to be the only girl in the classroom. Amanda is Prosser's top programming student and only female student. Her goal is to one day be an example for other females to go into computer science. Amanda's father encouraged her to attend Prosser to try out the programming pathway to see if she would like it. Amanda did not know how to program prior to coming to Prosser, but was really good in math, was very logical, and liked to design. At Prosser, Amanda has learned Java, HTML, CSS, and Visual Basic. Amanda would like to encourage more females to pursue computer programming as she says it is not always about coding, but also about designing. Amanda is a PRIDE Work Ethic candidate, a member of National Technical Honor Society, and an Ambassador for Prosser. She carries a 3.9 GPA and plans on attending Indiana University Southeast to achieve her bachelors and masters in Computer Science.

Amanda is a senior at Borden High School. Her parents are Rick and Tammy Goodridge.
